

GREEN BUILDING SOLUTIONS

BRINGING INNOVATION

WWW.FLAMECOGROUP.NET

OUR PEOPLE AND THE ENVIRONMENT ARE AT THE HEART OF OUR BUSINESS.

ABOUT

FLAMECO GROUP

Established in Dubai, the city of futuristic landscapes and cutting edge solutions, Flameco Group is a conglomerate born out of a passion for innovation and state-of-the-art building solutions. Built on a genuine pride and responsibility, Flameco focuses on delivering exceptional services and quality products, providing customers with knowledgeable, professional and experienced engineering and customer service teams.

At Flameco a key factor that defines the way we do business is our unique perspective of partnership. We are committed to our employees, customers and suppliers. We are also committed to the environment, integrating sustainability into every level and aspect of our organization.

We believe in promoting environmentally friendly, quality products that bring out the elegance, beauty and practicality of building designs. We work consistently to update and improve our products and services to achieve even greater value for our customers.

Our approach is built on a system that involves all participants working together towards an optimal integrated solution that addresses all aspects of design.

We are dedicated to providing distinctive products and services to clients while taking on the role of a knowledgeable and reliable business partner at the same time.

WE BELIEVE THE FUTURE IS GREENER

At Flameco Go Green, we seek continuously to improve the quality of our products, services and processes, as well as to minimize the overall environmental impact of our daily business operations. We are committed to products designed with an eco-friendly philosophy, using sustainable materials and manufacturing processes.

As engineers, we dedicate our energies towards unfolding and analyzing client issues. Together with our business strategists we find the best, and most honest solution for every client situation.

We work with you and we work for you to ensure that solutions are tailored to your immediate and long-term needs.

The safety goal at Flameco is to create and sustain an injury-free work place in all of our business divisions. We strive to achieve zero injuries, zero accidents and zero risks.

WE EXPAND WITH YOU

WE SEE YOUR FUTURE AS OUR FUTURE

At Flameco our values are founded on integrity and humility. We believe we are here to lay down the foundations that will sustain our clients' businesses. We value sincere relationships with our clients and stakeholders and believe that real success is achieved through partnership. At Flameco, your future is our future.

Flameco Group is present in several countries across continents, including the UAE, Saudi Arabia, Jordan, Egypt, Sudan, Nigeria, South Korea ,Turkey, Germany and The Americas.

OUR EXPERTISE

2017 AND BEYOND

We are in constant search of opportunities to cooperate and forge new relationships, we invite you to explore our business and the many ways we can be of service to you.

Expert project handling, setting challenging goals and standards, measuring results, providing honest feedback on individual contributions and rewarding achievements.

MULTIPURPOSE PLASTER

_____ Multipurpose plaster is a mix of Perlite Plaster lightweight thermal insulating aggregate (A) and a prebagged cement /sand /fibers /admixtures product (B).

Multipurpose Plaster is a 100% natural & SUSTAINABLE European siliceous volcanic glass mineral product, noncombustible (Class A1 / DIN 4102), ultra-lightweight (80 Kg/m³), thermal insulating (K=0.044 W/mK Dubai Central Laboratory Certified), chemically inert, odorless, neutral (pH=7), that lasts-for-a-lifetime and does not rot-off or deteriorate, like chemical insulators do.

Multipurpose Plaster is extremely lightweight (dry density of 500 Kg/m³), thermal insulating (K = 0.072 W/mK, Dubai Central Laboratory certified - the most thermal insulating render available worldwide), strong (compressive strength of min. 2.5 MPa, pull out test of 0.4 MPa), fire-resistant (over 50 UL rating with up to 5-hours fire resistance) and acoustic insulating, manufactured at our ISO 9001 certified, state-of-the-art production facility in Jebel Ali, Dubai. Perlite LW Insulating Plaster is applied on ordinary rush coat, at all surfaces (concrete, AAC blocks, hollow blocks, cement boards), at thicknesses of 10 – 30 mm in one coat.

OUR PRODUCTS

FURNITURE TIMES JOURNEY OF DISCOVERY

We provide solutions at optimal prices and without compromising on quality in accordance with world standards. Customer satisfaction is our aim with a strong, innovative, dynamic, efficient and reliable team able to deliver to reach the customer's expectations.

Furniture Times offers new generation solutions worldwide, by performing standard and customer-specific production with its wide product range, quality, and advanced technology.

With its customer-oriented understanding, superior quality and reasonable price policy, Furniture Times offers service with its experience and dynamic staff brought from the past to the present.

We have gained experience in the fields of design, application, import and export in the furniture industry for many years.

OUR PRODUCTS

STONE TIMES MARVELS OF NATURE

We Bring The Serenity Of Nature Into Your Space

Stone Times is a leading supplier of natural and engineered stones. We deliver international standards of design, application, import and export of a wide selection from our boutique collections of granite, onyx, quartz, travertine, semi-precious slabs and porcelain tiles.

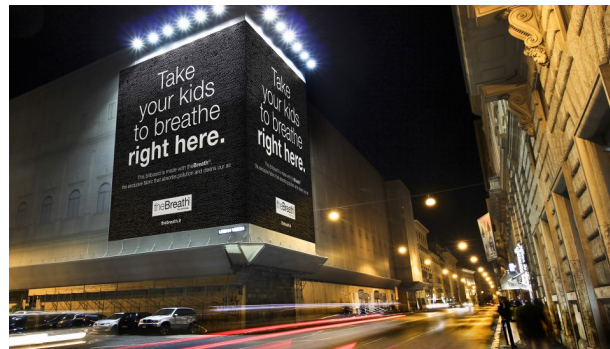

the BREATH

theBreath® is a technology that can be perfectly used in public and private indoor spaces to reduce the pollutants caused by heating, allergens, chemical products and fine particulates. Especially in public places, like hospitals, offices and schools, theBreath® can be used as a valid printing support for informative or teaching material.

theBreath® is an indispensable tool for professionals working in the furnishing industry, such as designers and architects, to enrich their projects with ethical contents linked to the environment and the innovation.

Why choose theBreath®:

theBreath® is constantly being developed in the market of the maxi-placards at worksites. Leading national and international companies decided to link their brand to a more responsible and sustainable advertising activity and they now use our technology as the basic system of their communication.

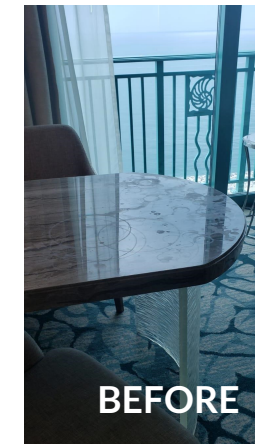

OUR PRODUCTS

TuffSkin

TuffSkin is a proprietary structural sealer developed to protect calcium based stone from all etching and staining. The protected surface is warranted to be acid, alkaline, water and oil proof.

Why TuffSkin?

- 1 Acid Proof:** the biggest opponent to Marble-like surfaces are their absorbing attributes from being porous. On contact, acid can permanently damage calcium based stone.
- 2 Stain/Oil Proof:** any colored liquid left resting on the surface of a stone can cause a permanent discolor. TuffSkin prevents any liquid from penetrating its surface.
- 3 Water Proof:** high alkaline can damage your stone just like anything acidic. By creating a barrier between the surface of the stone and the water, alkaline or other chemicals in water cannot damage the stone.
- 4 Heat Resistant:** TuffSkin can withstand up to 400 degrees.

SOLUTIONS FOR THE ELECTRICAL CONSTRUCTION INDUSTRY

LIGHTING SOLUTIONS

Flameco is a fast growing technology company focused on Green Energy Concepts and LED Lighting. We are a System Integrator delivering the cutting edge solutions in the Lighting and Solar Energy Industry. Flameco as a renowned distributor for LED lighting is incorporated in Dubai, UAE the City of Lights.

Flameco product line encompasses leading and emerging manufacturers in the lighting industry. Our manufacturers light fittings are made in state of the art manufacturing facilities with best quality components carefully chosen across the world. Flameco Brand products are certified by all leading agencies for statutory requirements for every market we sell.

POWER SOLUTIONS

The high quality of the products supplied by Flameco has played a significant role in developing a loyal clientele. All products supplied by Flameco meet stringent international quality standards.

Flameco specializes in the supply of ATEX, UL, CSA, GOST, and INMETRO approved products for intrinsic safety and explosion proof applications.

 **Atex Certified, Intrinsically Safe
Products & Solutions**

Our technical team can offer advice on applications for hazardous location installations. We offer an unrivalled service through our network of global manufacturers which allows us to source and supply items with vastly reduced lead times.

FIBER PROTECTOR

Fiber ProTector® the most technically advanced and effective fiber protection system available. It is designed to help keep fibers clean and stain free. This treatment will significantly increase and maintain the original appearance, while extending the service life cycle of carpets and fabrics. It has a long residual effect and is completely harmless to humans, animals and the environment.

FABRIC TREATMENTS
SINCE 1996
MADE IN NORWAY 

Fiber ProTector has for many years been the preferred anti soil and stain treatment for numerous hotels, cruise ships, airliners, public transportation, cinemas, corporate offices and bespoke manufacturers of carpets and fabrics.

Fiber ProTector when applied forms an invisible shield around the fibers providing an effective barrier against all kinds of organic matter, fluids, dust and debris that on unprotected textiles would result in permanent stains. Fiber Protector adds UV protection, and does not affect surface texture and breathability.

NANOTECHNOLOGY FOR THERMAL INSULATION

I-Gloo AdvanceLine

Designed for thermal insulation of inner and outer walls, roofs and ceilings.

**Civil Defence A1 Fire
Rated ISO 9001
ISO 1421**

- Premixed and single component skim coat.
- Highest known thermal insulation capacity.

Composite Pool Systems

Creapool consists of two steel cages that were prepared by using reinforced weld and panels which were inserted amongst those steel cages.

Creapool Pool Features

- Creapool is a fast installed modular and scaleable pool system.
- It can be produced in all different types. Please contact us for special orders.
- Creapool is environmentalist, provides less concrete use. It lowers your carbon footprint.
- Can be performed on all kind of ground.
- It has skimmer system and overflow system options.
- The surface of creapool is fit to be covered liner, ceramic or mosaic in all types you wish.

Advantages of Creapool Pool

- Installation of the Creapool composite panels that were prepared before are 70% faster than classic systems.
- Because Creapool is fast installed and lowers iron and concrete quantity, it has cost advantage up to 40%.
- When Creapool is finished it is not different from concrete pools and is very long-lasting.
- Registered Creapool panels provides less heat loss up to 70% compared to classic systems in winter seasons.

Dimensions of Creapool

- Creapool has no limit in its dimensions, even it is 9 m² or 900 m², it can be produced in any dimension you need. Our engineers will serve you the best filtration system and nozzle options, which were calculated studiously compared to dimension and form of your pool.
- Choose the dimension you wish compared to your needs and area, or call us to help you place it. Your pool does not have to have straight walls, call us for special production options.

Lower your
concrete
and iron
need
50%

Think of the environment while providing
advantage of time and cost in your pool,
lower carbon footprint with Creapool!

*Concrete is responsible for 8% of carbon release that occurs
all around the world. 2.2 billion tons of carbon dioxide were
released into nature with concrete production in 2016.

SuperElastiK

Bi-component cementitious elastic membrane

SuperElastiK is applicable on horizontal and vertical surfaces up to 2 mm thick in one hand. Mixing the two components gives you a smooth and fluid dough capable of waterproofing with great effectiveness.

Suitable for waterproofing and protection of concrete structures, plasters, cement screeds, balconies, terraces, bathrooms, and swimming pools, complies with the requirements of EN 14891 and EN 1504-2 coating (C) principles PI, MC, and IR. Complies with Reg. (EC) No. 1907/2006 (REACH) requirements - All. XVII, item 47.

FIELDS OF APPLICATION

1. Waterproofing of:

- Bathrooms, showers, balconies, terraces, pools, etc.
- Before the installation of ceramic coverings.
- Plasterboard surfaces.
- Plastering or cementitious.
- Lightened concrete blocks.
- Multi-marine layer.
- Concrete tanks for water containment.

2. Elastic shaving of:

- Concrete products with thin sections subject to deformation under load.

3. Protection of plasters or concretes:

- Which have withdrawal cracks.
- Against the penetration of water and aggressive agents in the atmosphere.
- Carbon dioxide penetration.
- Piles and concrete decks.
- Road and rail viaducts.
- Structures with an inadequate thickness of the iron cover.
- Concrete surfaces in contact with seawater and defrosting salts such as sodium chloride and calcium chloride, and sulfate salts.

KERAKOLL GREEN RESEARCH GIVES US THE HOME OF TOMORROW

KERAKOLL
The GreenBuilding Company

Leading Italian levellers, waterproofing, adhesives, grouts & so much more...

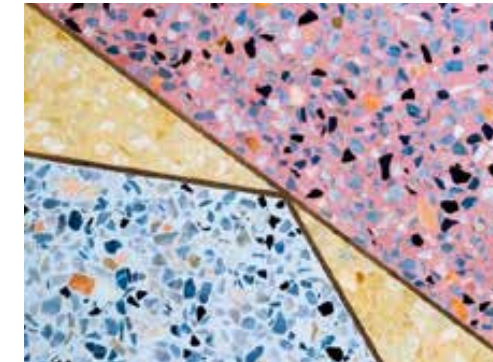

Mineral-Based Geo-Polymer Material

A Next-Generation Flooring Solution

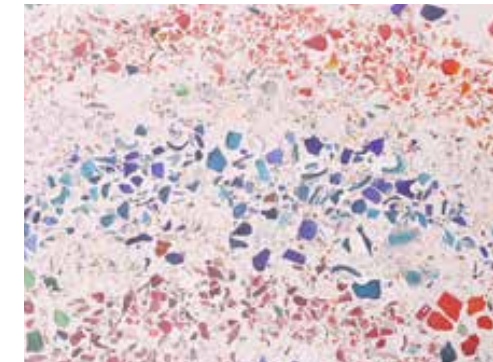

The Versus LiquidFloor® (Geopolymer Floor) is an innovative concept entirely conceived and created in Italy, by creative minds with a vision that combines modern luxury with the research and development of high-quality and trending materials.

Texture 1

Texture 2

Texture 3

Environmental Sustainability

With its mineral-based composition, the Versus LiquidFloor® reduces reliance on non-renewable resources and minimizes the carbon footprint associated with flooring materials. It presents a sustainable alternative that aligns with eco-conscious practices.

UNCOMPROMISING QUALITY

Thanks to extensive research by our laboratories, the Versus LiquidFloor® line can explore various styles of home design while maintaining high quality standards. Superior mechanical resistance & high speed of action beauty, uniqueness, durability, mechanical resistance, practicality, and hygiene are the distinguishing features of the Versus LiquidFloor® concept.

Liquid Design Tiles

The Art of Wall Branding

Versus Concept brings innovation to interior design with Liquid Design Tiles, a unique fusion of high-quality wall printing and precision craftsmanship. Through advanced nanotechnology and premium-grade inks, we transform your creative visions into striking, durable wall art that elevates any space.
